

Advanced Features three10 X Room Connector

three10 X Room Connector

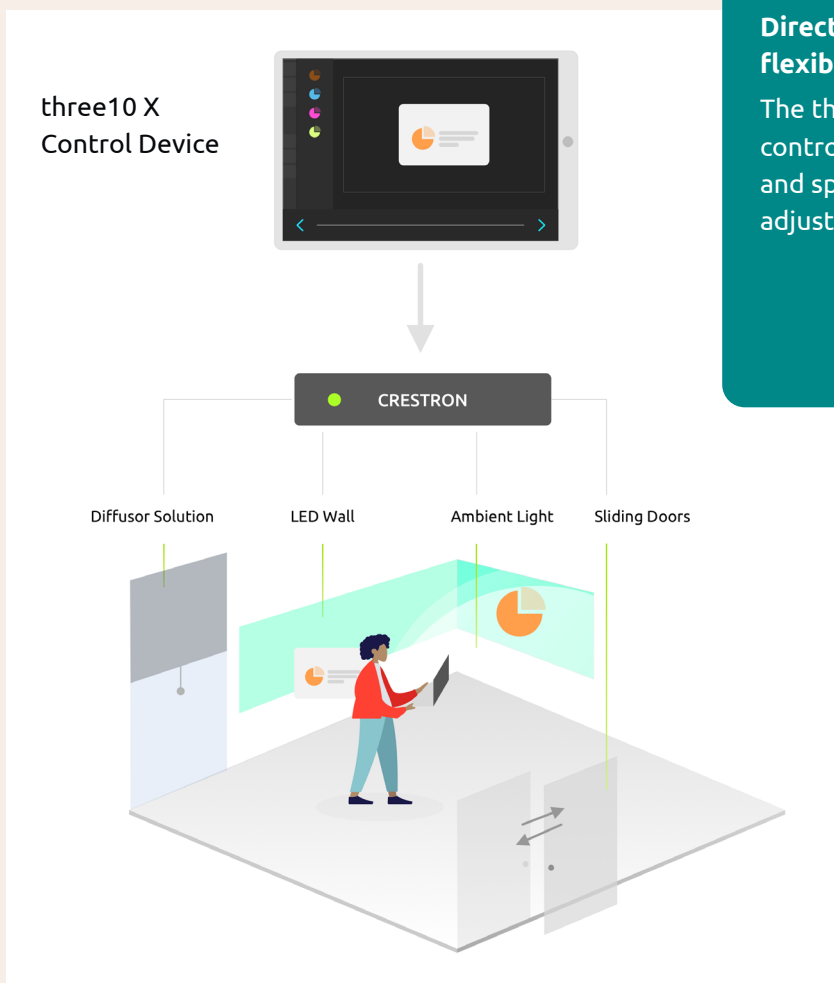

Create a holistic and emotional experience with three10 X

Our innovative software platform three10 X enables you to conceptualise stunningly beautiful and convincing presentations in an easy and intuitive manner. By doing so, your ideas receive the visual persuasive power they deserve.

three10 X is able to integrate and merge several different media types, such as images, videos, 3D renderings or live streams.

Would you like to enhance your presentation by including pre-defined room modifications?

With the help of the central Crestron control unit, various ports (digital, analogous, serial) can be managed and extended at any time.

Direct controls: easy and flexible

The three10 X direct controls allow for quick and spontaneous setting adjustments.

Module Description

three10 X Module Crestron Connector

Module to include Crestron Direct Controls in the three10 X user interface.

Combining Crestron presets with three10 X slides, for example, to dim the light automatically when calling up a movie preset. Facilitates the creation of smooth presentations flows which have the room interact with the content.

As the Crestron user interface can be integrated into three10 X, the need to change interfaces is omitted. Also, no additional input devices are required.

Control of Crestron Control parameters displayed as sliders, toggles or triggers in the three10 X user interface.

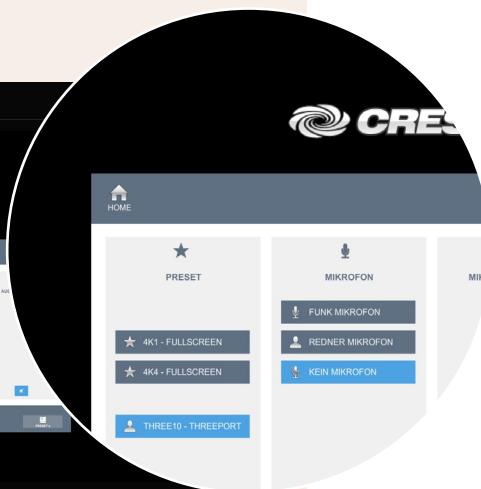

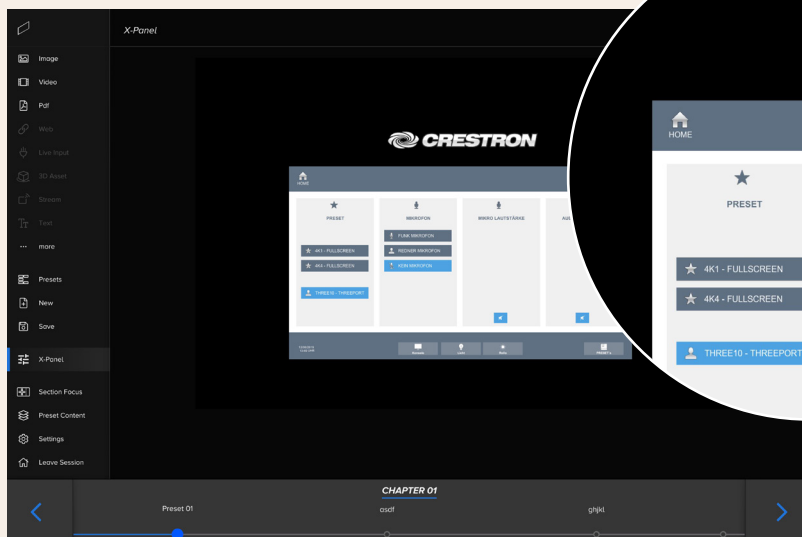

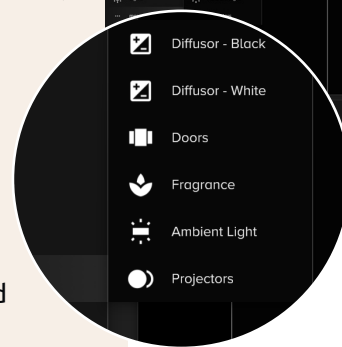

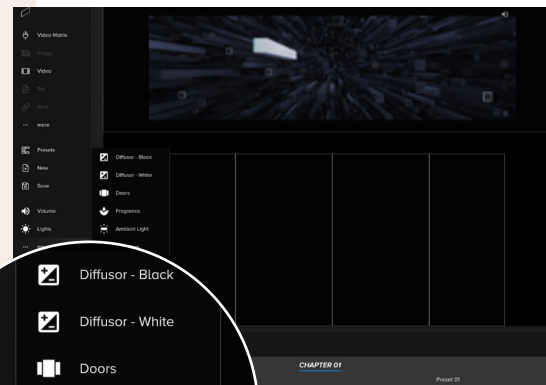

Supported Hardware

- Crestron CP3/CP4

Precondition

- three10 X Suite

Potentially necessary adjustments / services are not obtained in the license price!

three10 makes software to create visually rich experiences for presentation and collaboration.
